About Me

I am a passionate and motivated Bachelor of Information Technology graduate.

My three years of studying has provided me with a strong foundation of knowledge in software development, design fundamentals, web development and advanced programming.

Achieving team awards during my study, I have proven my ability to perform well in team-oriented projects, communicating ideas, providing critical feedback and contributing to the success of the projects.

Always willing to learn and try new ideas to further develop my skills. I am eager to start my journey of continuous learning as a Software Developer.
